SUMMARY

- Seasoned front-end developer with **19 years of experience**, having served in senior roles across various sectors, including technology, financial services, retail, logistics, and media, at global enterprises, startups, and consulting firms.
- Reduced QA issues by 42% at Dog & Pony by introducing the culture of peer reviews and mentoring less experienced developers and designers.
- Increased sales at Bradesco Seguros by 27% with the new e-commerce platform. My contributions included recommending faster APIs and creating a quick and responsive checkout process.
- Developed an app for Luiza Labs that achieved a 96% daily active user rate in the first six months post-release.

PROFESSIONAL EXPERIENCE

Dog and Pony Studios

Toronto, ON

Senior Front-end Developer

April 2024 – Present

DPS is a full-service agency specializing in the financial industry. We serve large institutions like S&P Global, Bloomberg, and some major Canadian banks.

- Create highly customizable websites using Contentful, React/Next.js and Tailwind.
- Develop reusable components and showcase them in Storybook.
- Integrate the React app with the Contentful CMS using GraphQL.
- Assist designers in adapting designs to significantly reduce development time.
- Improve development processes to shorten project delivery time.

Domino's Pizza

Michigan, USA

Senior Front-end Developer

September 2023 – April 2024

Domino's Pizza is a leading global pizza delivery company specializing in providing quick and convenient meal solutions. With an extensive network of over 18,000 stores in more than 95 countries.

- Tasked with developing a web app to replace an on-premises system used in thousands of global stores using React, GraphQL, Redux, RxJs and SASS for the front-end.
- Developed a platform enabling store managers and franchise owners to extensively customize operations using Agile methodologies.
- Maintained a test code coverage of 90%+ using Jest/Testing Library.
- Mentored Jr. devs to understand our complex tech stack and help them to deliver better code.

Bradesco Seguros

São Paulo, Brazil

Senior Front-end Developer

August 2022 – September 2023

Bradesco Seguros is the insurance branch for one of the biggest banks in Brazil, Bradesco, which had a revenue of 40 billion USD in 2023.

- Hired to develop a new insurance e-commerce platform using SAP Commerce, Angular, TypeScript, NgRx, RxJS, and SASS in a cloud environment.
- Responsible for translating designs into functional features across all products.
- Maintained a strong emphasis on unit and integration testing with Jasmine and Karma libraries to ensure code reliability and quality.
- Provided detailed code reviews, offering feedback to help junior developers improve their skills.
- Recommended changes to enhance design feasibility and suggested updates for APIs to accommodate changes in legacy code and behaviors.

Luiza Labs

São Paulo, Brazil

Senior Mobile Engineer

September 2020 – August 2022

Luiza Labs is the technology division of Magazine Luiza, a leading global retail company specializing in providing quick and convenient shopping solutions. With an extensive network of over 1,400 stores across Brazil.

- Took charge leading the mobile development of a hybrid asset management application using React Native, TypeScript, Context API and Rest API.
- Worked closely with backend developers and the product team to ensure seamless integration of frontend and backend functionalities.
- Implemented code optimization techniques and expanded unit testing to ensure code quality and application reliability.
- Ensured the application was compatible with various devices, enhancing its accessibility.
- Oversaw the management and deployment of releases on Google Play and the Apple Store, ensuring timely updates and enhancements for users.

EVI Technology

São Paulo, Brazil

Senior Front-end Engineer

November 2018 – September 2022

EVI Technology, founded by three industry partners, focuses on optimizing truck fleet management. Initially aimed at enhancing internal efficiency, the startup plans to market the software to the broader logistics industry as it matures.

- Led the front-end development of an end-to-end logistics solution, built to increase efficiency for truck logistics management offices using React.JS, Redux, Tailwind, Chart.JS and Leaflet Maps.
- Worked closely with front-end colleagues, back-end developers, and data scientists to develop the back office platform, ensuring seamless integration of functionalities.
- Utilized Leaflet to implement a dynamic map displaying real-time truck locations, enabling continuous automatic updates for precise tracking.
- Developed intricate charts using Chart.js, integrating cross-referenced data and filters for comprehensive fleet management comparisons.

- Handled front-end development, feature implementation, and integration of live-updating map functionality for tracking truck locations.
- Optimized data visualization to boost fleet management efficiency within the logistics solution.

EDUCATION

Australian Pacific College , UX Design Diploma @ Sydney/Australia	2013 - 2015
Universidade Paulista , Web Design Diploma @ São Paulo/Brazil	2004 - 2006
