Profile

Front-end developer with a solid background since 2005. Experienced in building complex products through collaboration using Agile methodologies. Skilled in React, Angular, and their respective ecosystems.

As a User Experience advocate, I code beautiful and functional products aiming for accessible experiences. I communicate seamlessly with designers, helping them understand technicalities with ease, in order to achieve the best feasible solutions.

Committed to clean code, I stay current with tech trends out of passion, not necessity. I am collaborative, eager to learn, always polite, and easy to speak with.

Education

React Native Certificate - Meta (Facebook) & Coursera - 2023

Front-End Developer Certificate (React) - Meta (Facebook) & Coursera - 2023

UX Design Diploma - Australian Pacific College - Sydney, Australia / 2013 - 2015

Web Design Diploma - UNIP - Sao Paulo, Brasil / 2004 - 2006

Skills & tools

- React, React Native, Next
- Redux, Context API
- HTML, CSS/SASS, Tailwind

- Jest, React Testing Library
- Rest API, GraphQL
- Micro Frontends

- Scrum / Kanban / Lean
- UI Design, Adobe CS
- Storybook, Figma

Work experience

Dog & Pony Studios (Toronto, Canada) - *Apr/2024 - Present (Remote)*
↳ **Senior Front-end Developer (React)**

Technologies: React/Next, Tailwind, Contentful, GraphQL, Storybook

DPS is a full-service agency specializing in the financial industry. We serve large institutions like S&P Global, Bloomberg, and major Canadian banks.

In my role, I create highly customizable websites using Contentful and the React/Next.js. I develop reusable components and showcase them in Storybook. We then integrate these components with Contentful and dynamically populate them with data using GraphQL.

CI&T @ Domino's Pizza (Brazil/USA) - *Sep/2023 - Apr/2024 (Remote)*
↳ **Senior Front-end Developer (React)**

Technologies: React, Redux, Redux-Observable, SASS, Jest/Testing Library, GraphQL

As a consultant, I was an integral member of the front-end development team for one of the world's most renowned pizza franchise chains, Domino's Pizza, headquartered in the U.S.A.

We were tasked with engineering a web app that will replace an on-premises system that runs on thousands of global stores. This platform will empower store managers and franchise owners to customize their operations extensively, from pricing and business hours

to the selection of pizza offerings, which nowadays is done by Domino's administration in a ticket system, which is far from ideal.

Additionally, the system includes a sophisticated pizza assembly line interface that assists kitchen staff in the pizza preparation process. It features visual SLA indicators for each order, enabling the team to swiftly identify and prioritize orders at risk of delay, ensuring efficiency and customer satisfaction.

Act Digital @ Bradesco Seguros (Brazil) - *Aug/2022 - Sep/2023 (Remote)*
↳ **Senior Front-end Developer (Angular)**

Technologies: Angular, TypeScript, NgRx, RxJs, SASS, Karma/Jasmine

As a consultant, I was positioned within the insurance division of one of Brazil's leading banking institutions.

As a dedicated front-end developer, I was responsible for implementing designs from the product team across all offered products using Angular. I maintained a strong focus on unit and integration testing with the Jasmine and Karma libraries.

My responsibilities also included mentoring junior developers, guiding them with detailed code reviews and feedback. Additionally, I offered recommendations to enhance design feasibility and suggested updates for APIs when legacy code and behaviors needed.

Luiza Labs / Magazine Luiza (Brazil) - *Sep/2020 - Aug/2022 (Remote)*
↳ **Senior Mobile Engineer (React Native)**

Technologies: React Native, TypeScript, Context API, Jest/Testing Library, Rest API

As the sole React Native developer for Brazil's largest retail conglomerate, I led the creation of a hybrid asset management app. My role involved close collaboration with backend developers and the product team, utilizing technologies like React Native, Typescript, and Jest, along with CI/CD tools.

I was responsible for code optimization, expanding unit tests, ensuring cross-device compatibility, and managing releases on Google Play and the Apple Store, significantly enhancing application performance and reliability.

Betta Tecnologia @ EVI Technology (Brazil) - *Nov/2018 - Sep/2020 (Remote)*
↳ **Senior Front-end Engineer (React)**

Technologies: React.JS, Redux, Tailwind, Chart.JS, Leaflet Maps

As a consultant embedded with a freight logistics firm, I contributed to developing a comprehensive end-to-end logistics solution. In my main role as a front-end engineer, I collaborated closely with another front-end colleague, back-end developers, and data scientists to develop the back office platform. I implemented a dynamic map using Leaflet to display the real-time location of each truck, ensuring continuous automatic updates. Additionally, I developed intricate charts through Chart.js, incorporating cross-referenced data and filters for comprehensive comparisons.

I handled front-end development, feature implementation, and the integration of a live-updating map for tracking truck locations. I also improved data visualization to enhance

fleet management efficiency. Technologies and tools used included React, HTML, CSS, JavaScript, Redux, real-time data streaming, Leaflet, Chart.js, and CI/CD pipelines.

Unitransact Pty Ltd (Sydney, Australia) - *Aug/2013 - Nov/2018 (Remote)*
↳ **Frontend Developer / UX Designer**

Technologies: HTML, CSS, JavaScript, WordPress/PHP, Photoshop, Illustrator, Axure

As the sole Frontend Developer and UX Designer, I enhanced the user experience on the company's main platform by designing and implementing new features, resolving bugs, and maintaining customer communication. I used HTML, CSS, JavaScript, WordPress, Adobe Photoshop, Illustrator, and Axure for development and design.

I also managed the company's website and created promotional materials, including newsletters, websites, infographics, and social media graphics. Ensuring responsive designs, cross-browser compatibility, and optimized website performance for faster load times and better SEO were key aspects of my role.

Catho Online (Brazil) - *Jul/2011 - Mar/2013*
↳ **Frontend Developer**

Technologies: HTML, CSS, JavaScript/jQuery

Served as a Frontend Developer for the leading job portal, collaborating with the UX team to transform designs into functional features using HTML, CSS, and JavaScript/jQuery. My responsibilities included developing new products and features and fixing bugs to enhance user experience.

I also created and maintained a reusable code library, streamlining development processes and ensuring consistent implementation across initiatives. This improved efficiency and maintained high code quality, aligning front-end development with the UX team's vision and contributing to the job portal's success.

Grupo Jovem Pan (Brazil) - *Set/2005 - Mar/2010*
↳ **Web Designer**

Technologies: HTML, CSS, Javascript, WordPress, Photoshop, Illustrator, Flash

Starting as a Web Design intern, my web development journey involved creating tailored web pages for events, promotions, and blogs using WordPress. I handled both design and coding, utilizing HTML, CSS, JavaScript, Photoshop, Illustrator, and Flash. My tasks included designing web pages, creating promotional graphics, and crafting visual elements like logos and banners, along with using Flash for presentations and animated banners.

Hired as a Junior Web Designer after one year and promoted to Mid Web Designer another year later, I consistently contributed to various online initiatives. I continued to design and develop web pages, create interactive content, and ensure the visual appeal of promotional materials. My role evolved to support more complex projects, maintaining high standards in web design and development.
